

AFES

AFES Seminar

February 2010

Station Hotel, Guild Street

Wed 3rd February 2010; 9.00 am for 9.30 am start

Fluids in the reservoir; Understanding capillary pressure and saturation height functions

Post seminar dinner

Preliminary Programme

Richard Fairbairn (CNR): **Introduction and overview of key issues.**

Mike Lovell (Leicester University): **Keynote address.**

Alan Johnson (Shell UK): **Established saturation height functions - part 1.**

Steve Cuddy (Baker RDS): **Established saturation height functions - part 2.**

Richard Arnold (Core Lab UK): **Wettability - basic concepts.**

Craig Lindsey (Baker RDS): **Core data for saturation height models.**

Mike Millar (Suncor): **Saturation height functions in chalks.**

Colin McPhee (Senergy): **Saturation height from core.**

Joe Pumphrey (Logicom): **QSCAL software**

Steve Anthony / Graham Robertson (Corex UK): **Talk to be announced.**

Cost £50 (students £10) dinner not-included

Please Pre-Register with Craig Lindsay email: Craig.Lindsay@baker-rds.com

Complimentary buffet and bar
